**SUPPLEMENTAL DECLARATION ESTABLISHING
DILIGENCE UNDER 37 C.F.R. §1.131**

Sir:

1. I, Rohini K. Garg, am a patent agent registered to practice before the U.S. Patent and Trademark Office. At the time of the preparation of the above-identified application, and until September 9, 2005, I was employed by Hoffmann & Baron, LLP as a patent agent and was a legal representative to the inventors herein.

2. I submit this Declaration in support of the response to an Office Action mailed September 26, 2005.

3. In an effort to support diligence from a date prior to July 17, 2001, to September 21, 2001, I submit that at the time of preparation of the patent application, I read and understood the invention disclosure (identified as AT&T Disclosure No. 2000-0322), a copy of which

having previously submitted as Exhibit A. Based on this invention disclosure and subsequent communications with the inventor, I was in full possession of the claimed invention.

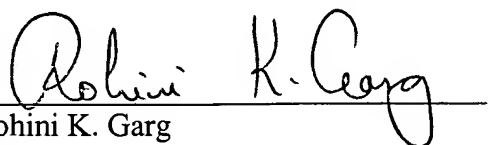

4. My e-mail dated Friday, September 21, 2001 to the inventors, previously submitted as Exhibit C, requesting that the inventors elaborate more on the feature of “preventing to storage of the wireless caller’s location information on the network” was made to request that the inventors clarify, in the application draft, the information contained in the invention disclosure.

5. Furthermore, in an effort to support diligence from the period of September 21, 2001 (Exhibit C) to December 5, 2001 (Exhibit D), I declare that a complete copy of the draft application was “attached” to the e-mail as evidenced by the notation on the bottom of the e-mail “63715_1.doc”. I also declare that this current draft no longer exists either electronically or in hard copy.

6. I further declare that a final draft of the application was forwarded to the inventors with a letter dated December 5, 2001, which has previously been submitted as Exhibit D. The final draft included with that letter was filed as the present application.

7. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment or both under Section 1001 of Title 18 of the United States Code and that such willful false statements made jeopardize the validity of the application or any patents issued thereon.

Dated: 11/28/2005

Rohini K. Garg
